Fibernow TV Experience

Your cloud-based TV service combines live TV, on-demand content, cloud DVR, and your favorite apps — all in one place, ready to enjoy anytime.

Remote Guide

Welcome to Fibernow.

Quick Tips to Get Started

- Turn off old networks**
Make sure you don't have duplicate networks running.
- Connect your devices**
Add all WiFi-enabled household devices to your network.
- Create profiles**
Customize the network experience for each family member.
- Enable notifications**
Stay informed when a new device connects or if an issue arises.

Intelligent WiFi

The Plume Home app is your all-in-one tool for managing your WiFi. Boost bandwidth when you need it, create profiles for each household member, and keep your network secure.

Plume Home App

Download the Plume Home App to manage your WiFi, connected devices and more:

The image displays five smartphone screens illustrating the app's features, each with a callout icon and text:

- Top Left:** A pink arrow icon in a circle. Text: "Navigate the app using the settings button". The screen shows the "Home" screen with a settings gear icon at the bottom right.
- Top Right:** A pink clock icon in a circle. Text: "Manage timeouts and activity feed". The screen shows the "Network" screen with a "Connectivity" tab selected.
- Bottom Left:** A pink Wi-Fi icon in a circle. Text: "Check network speed and login information". The screen shows the "Manage" screen with "Timeout & Focus" and "Traffic boost" sections.
- Bottom Right:** A pink eye icon in a circle. Text: "See connected devices and network topology". The screen shows the "Network" screen with a "Devices" tab selected.
- Center:** A pink Wi-Fi icon in a circle. Text: "Check network speed and login information". The screen shows the "Home" screen with a "Check speed" button at the top right.
